

# KONTAKTE, ANSCHLÜSSE

- Hier finden Sie Kontakte zur kabellosen Energie- und Datenübertragung. Die vergoldeten Oberflächen sind sehr gut leitfähig und korrosionsbeständig und gewährleisten so eine zuverlässige und sichere Kontaktierung.
- Im OKW Programm gibt es bereits Gehäuse sowie Sockel und Halterungen für externe Stationen mit vorgeformten Aufnahmen für den Einsatz der Kontakte. So kann der Anwender vorhandene Akkus und Batterien in Geräten kabellos aufladen und Daten übertragen – ideal für mobile Kommunikationsgeräte!
- Batterie-Kontaktfedern in unterschiedlichen Oberflächen und Geometrien für OKW Gehäuse.
- Große Auswahl an Printklemmen und Stiftleisten.
