

RAILTEC B

Boîtiers polyvalents pour rails de norme DIN

Le montage rapide et simple par encliquetage sur les rails conformes à la norme DIN EN 60715 TH35 caractérise les boîtiers de la famille RAILTEC.

- 6 tailles (2-12 modules) analogues norme DIN 43880, taille 1;
- 4 tailles de cadre dans la conception plat - **NOUVEAU** : 2 versions;
- 4 tailles (2 à 9 modules) avec niveaux de raccordement plat/élevé
- boîtiers entièrement isolés et avec protection contre les contacts directs selon la norme VBG 4 et IEC 529/ DIN VDE 0470-1
- matériau ignifuge (UL 94 V-0).
- **version I et XI** : pour borniers à circuits imprimés, grille 5,0/5,08
- **version II et XII** : pour réglettes à broches, grille 5,0/5,08
- **version III et XIII** : boîtiers fermés, par ex. pour connecteur enfichable par l'avant, connecteur SUB-D, etc.
- **version IV** : pour borniers à circuits imprimés, grille 5,0/5,08 (en bas seulement)
- **version V** : avec perforations, grille 5,0
- **version VI** : boîtiers ouverts pour configurations personnalisées (cache-bornes/cloison), au choix, un ou deux niveaux de raccordement
- recouvrement pour les connecteurs enfichables KNX; conviennent pour les modules 2 et 4 des versions VI ou parties supérieures plat
- conviennent pour les rails DIN EN 60715 TH35 ou pour une fixation directement au mur
- avec/sans fentes d'aération pour une bonne évacuation de la chaleur
- souplesse au niveau de l'insertion de composants : positionnement des circuits imprimés avec trois orientations possibles ; partie inférieure avec bossages de fixation, partie supérieure avec guidages
- prémontage d'un clip de fixation dans la partie inférieure
- le couvercle transparent (accessoire) protège les éléments d'affichage et de commande
- degré de protection < IP 40

RAILTEC B

Exemples d'applications

- Utilisation universelle dans le domaine des installations
- Le boîtier satisfait aux prescriptions de l'industrie de la construction mécanique et de l'industrie automobile
- Équipement technique pour l'automatisation en bâtiments et la domotique SMART-HOME
- Convient en particulier pour la technique de commande et de régulation

Appareils de mesure de la puissance pour l'analyse énergétique

Compteur intelligent pour la consommation d'électricité

Compteur à distance pour la surveillance de l'état

Détecteur de niveau d'eau

Indicateur de défaut à la terre et de court-circuit

Modems industriels VDSL2/ADSL2

Surveillance des variables électriques

Système de bus CAN pour machines d'emballage

Modifications spécifiques client

De quoi avez-vous besoin pour réaliser un produit entièrement personnalisé ? Si vous le souhaitez, nous vous fournissons les boîtiers et boutons prêts à l'encastrement, toutes modifications et finitions demandées comprises. Options de personnalisation pour Railtec B

Usinage mécanique

Peinture

Impression

Marquage laser

Étiquette, Films de décoration graphique

Assemblage/montage
